

Title of the subject	: Compound feed production and feeding technology
Subject leader	: Csaba Szabó, PhD, associate professor
Prerequisite	: none
Credit	: 3
Short description of the subject	: The production potential of the farm animals increased significantly during the past decades. This had been followed by the development of compound feed production technology. The production of the compound feeds needed by the high genetic potential animals not only means the mixing of the components. The aim of the subject to present the modern compound feed production technology, the machines and innovative techniques used as opposed to the effect on animal productivity.
Compulsory reading	: American Feed Industry Association 2005 Feed Manufacturing Technology. AFIA, USA Digital handouts issued by the department.
Further reading	: Feed Science and Technology (periodical) Mpofu, I. 2004 Applied Animal Feed Science and Technology., Upfront Publishing, USA
